DALER ROWNEY

Daler-Rowney Environmental Policy

1. General Statement

First founded in 1783 Daler-Rowney has grown into an internationally renowned fine arts manufacturing company with colours and pigments still at its core. From paint, brushes and surfaces to accessories, luggage and easels, Daler-Rowney produces and sells products for artists of all experience levels.

At Daler-Rowney, we seek to minimize our impact on the environment through an audited process of reviews. All activities, products, and services are documented within our Aspects & Impacts Register. Client data is appropriately handled and stored during and after the completion of a project, and this is regarded as a high priority on par with the protection of its internal data. We became certified to ISO 14001:2015 in November 2025. Customer satisfaction is considered a top priority, and all staff are made aware of ways in which we can reduce our environmental impact. Environmental considerations are made within all our processes.

2. Aims & Objectives

Daler-Rowney is fully committed to:

- Minimising any negative impacts our business activities have on the environment
- Setting documented environmental objectives based on our significant environmental aspects, compliance obligations and considering our risks and opportunities
- Identifying all applicable local and international laws and regulations that apply to us and ensuring we are always in full compliance with these
- Identifying our key stakeholders and how our business activities impact them

- Continually improving our Environmental Management System (EMS) through objective and target setting with regular tracking of progress through management review
- Ensuring our EMS is in full compliance with the requirements of ISO 14001:2015.
- Minimizing production waste through re-use initiatives, production efficiencies and on-site sorting of recyclables with clear targets set and progress tracked.
- Minimise the amount of waste to landfill through the adoption of the waste hierarchy: ELIMINATE, REDUCE, REUSE and RECYCLE
- Reducing our carbon footprint. Partnering with expert consultants so that we reduce our Scope I-III emissions and where offsetting is utilised, using offsetting schemes that follow the core principles listed below.
    - Building a diverse portfolio aligned to Oxford Principles (transition to carbon removal)
    - Assess project baseline, additionality, leakage, permanence and durability
    - Analyse co-benefit and contribution to UN SDGs
    - Highlight the significance of nature-based & biodiverse systems
    - Ensure credit vintage issuance 2020 or later
    - Ensure that we integrate sustainability considerations into our business decisions
- Put controls in place to protect the environment from any significant environmental aspects and impacts arising from our work activities, including pollution.

This policy has been communicated to all employees of the business and organisations or businesses working for or on behalf of Daler-Rowney. This policy will be reviewed annually and updated where appropriate.
